

## Commercial Heifers Supplement Sheet

There are 60 Commercial Red Angus fall calving heifers. We have sorted them into groups of similar type and expected calving date. The heifers that settled A.I. were bred to Mushrush Triton A330 (Reference Sire E) or Mushrush Exacto (Reference Sire J). Natural service settled heifers were bred to our top calving ease Mushrush Red Angus herd sires.

***Winning bid for the bred heifers can take as many groups as they want, not necessarily in sale order.*** For example, if you want group A and E, you can take those. Please remember calving date is figured on a standard 283 gestation and that can vary from animal to animal. They can start before and may stretch beyond the printed expected calving date.

### **60 Fall Bred Heifers**

**Group A** – 8 head - Yellow tags - This is a group of **A.I. settled** heifers with an expected start date for calving of 9/10/2020. These heifers were purchased last Spring and not exposed as they were very young. Similar in type to Group E.

**Group B** – 11 head - Blue tags– This is a group of true Fall born **A.I. settled** heifers with an expected start date for calving of 9/10/2020. Similar in type to Group F and H.

**Group C** – 8 head – Dark Green tags - This is a group of true Fall born **A.I. settled** heifers with an expected start date for calving of 9/10/2020. Similar in type to Group G.

**Group D** – 5 head - White tags - This is a group of true Fall born **A.I. settled** heifers with an expected start date for calving of 9/10/2020. More moderate frame group. Similar in type to Group J.

**Group E** – 5 head - Orange tags – This is a group of **Natural service settled** heifers with an expected calving range of 10/2/2020 – 10/22/2020. These heifers were purchased last Spring and not exposed as they were very young. Similar in type to Group A.

**Group F** –10 head - Purple tags – This is a group of true Fall born **Natural service settled** heifers with an expected calving period of 10/2/2020- 10/22/2020. Similar in type to Group B and H.

**Group G** – 6 head - Lime Green tags – This is a group of true Fall born **Natural service settled** heifers with an expected calving period of 10/2/2020- 10/22/2020. Similar in type to Group C.

**Group H** – 2 head - Red tags – This is a group of true Fall born **Natural service settled** heifers with an expected calving period of 11/1/2020- 11/5/2020. Similar in type to Group B and F, just later expected calving date.

**Group J** – 5 head - Pink tags – This is a group of true Fall born **Natural service settled** heifers with an expected calving period of 11/1/2020- 11/5/2020. More moderate frame group. Similar in type to Group D, just later expected calving date.

### **33 Open Spring Heifers**

Thirty-three Open Spring January born heifers ready to breed this spring. They are very similar in size and type and ***will be sold gate cut 5 or more***. Vaccinations are up to date and they have had an OVC, and tested negative for BVD-PI. A reproductive tract score was conducted by Dr. Joel Andersen, Cross Country Genetics, on March 4<sup>th</sup>. All heifers offered had a 3-5 score which is excellent. In addition he examined each heifer to insure that pelvis was not irregular or small. They have individual yellow tags.
