

Commercial Female Supplement

Bred Commercial Red Angus Heifers

All heifers have tested negative for BVD-PI and are OCV bangs vaccinated. Prior to breeding, all heifers passed a pre-breeding tract exam to eliminate irregular pelvic openings.

On October 5, 2023 they were confirmed pregnant by Dr. Katie Miller, Rocking KM Veterinary clinic. Prior to breeding all heifers received at least 2 rounds of modified live vaccine and were boosted with a killed vaccine and poured with Cydectin at preg check.

Head Count	Sale Lot	Tag color	Description	Estimated Calving	Opening Bid
10	201-210	Orange	Solid Red	Mid February – March 2024	\$2300
